About 21st Century Consulting Company

The vision of a few energetic people in the USA and Russia inspired the idea of collaboration on the development of the best *Web-enabled software* across continents. Our dream was to build a company that could deliver the best *Web-enabled software* to the market on a 24 X 7 basis, and ensure quality and affordability. We can proudly say that we have lived up to our expectations. Due to the difference in time zones between the two continents, we are able to achieve ongoing development, testing and delivery. We also have access to the best technological resources in Russia and the USA, as well as unlimited labor. For these reasons, you can and should rely on 21st Century Consulting Company for your *Web-enabled software*.

The Company's vision is based on three main principles: **Quality, Delivery and Affordability**

Quality: Our goal is that your *Web-enabled software* works flawlessly the first time and every time, and that you are so satisfied with our service that you will recommend us to other people. While all organizations want to provide their customers with quality, not many can do the job that we are determined to do.

Delivery: All deadlines for development, testing and installation of your *Web-enabled software* will be met. You won't have to worry about your clients missing a promised deadline because you will be assured that you can start the new phase of your business expansion on time. You can rely on us!

Affordability: We can create *Web-enabled software* at a price that doesn't affect your other operations. As a result, you can invest a reasonable amount of your assets without worrying about your budget for this, or even the next quarter. We are committed to giving your business the best product at the lowest possible price.

New Project:

- [iPads Review](#) - compare iPad smartbooks and review iPads online
- [GPS Review](#) - GPS related information with forums, articles and blog
- [Russian Dating](#) - online dating site provides free access to dating profiles
